

Biochemistry & Molecular Biology Master's Scholarship Program

1. Scholarships will be awarded to qualifying Master's students after their first semester, beginning in Fall 2013.
2. Scholarships are awards that cover half of tuition and fees for the remaining 22 credits, and a total of \$3000 to partially cover supply costs to the lab mentoring the qualifying student.
3. To qualify, students must:
 - a. have and maintain at least a GPA of 3.5
 - b. have completed and submitted approved Plan of Work and Research Plan Forms, meaning that that have a research mentor and committee and an approved research plan
 - c. be full time research track (Option 2) students
 - d. not withdraw from any course or receive an incomplete other than the scheduled Y for BMB7890
4. Students must maintain these standards each semester to automatically receive the award the following semester.
5. Decisions will be made on a case-by case basis by the committee/adviser as to whether the award would be renewed after a leave of absence (without registration and no financial award for one semester) for the semester in which they return.
6. The number of scholarships awarded per year will be based on available funds. Wayne State University reserves the right to modify the program.
